CONTENTS

Volume 53, Issue Nos. 1–12 (2002)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Special Issue: *p* and *hp* Finite Element Methods: Mathematics and Engineering Practice (p-FEM2000)
Guest Editors: Zohar Yosibash and Manil Suri

Preface: Z. Yosibash and M. Suri 1

Dual-mixed *p* and *hp* finite elements for elastic membrane problems: E. Bertóti . . . 3

Singularity treatment and high-order RWG basis functions for integral equations of electromagnetic scattering: W. Cai, Y. Yu and X. C. Yuan 31

A *p*-version finite element approach for two- and three-dimensional problems of the J_2 flow theory with non-linear isotropic hardening: A. Düster and E. Rank 49

Chebyshev rational spectral and pseudospectral methods on a semi-infinite interval: B.-Y. Guo, J. Shen and Z.-Q. Wang 65

A *p*-adaptive algorithm for the BEM with the hypersingular operator on the plane screen: N. Heuer, M. E. Mellado and E. P. Stephan 85

Computation of electromagnetic scattering with a non-conforming discontinuous spectral element method: D. A. Kopriva, S. L. Woodruff and M. Y. Hussaini 105

Solution of contact optimization problems of cylindrical bodies using *hp*-FEM: I. Páczelt and T. Szabó 123

An *hp*-adaptive finite element method for electromagnetics—part II: a 3D implementation: W. Rachowicz and L. Demkowicz 147

This journal's homepage, where a Cumulative Author, Title and Subject Index is freely available, as well as a Conference Diary and Award Announcements, can be found at the address:

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Anbar), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematic Abstracts.

p-Version interface elements in global/local analysis: J. E. Schiermeier, R. Kansakar, D. Mong J. B. Ransom, M. A. Aminpour and W. J. Stroud 181

Mesh generation in curvilinear domains using high-order elements: S. J. Sherwin and J. Peiró 207

Extracting edge flux intensity functions for the Laplacian: Z. Yosibash, R. Actis and B. Szabó 225

AUTHOR INDEX 243

KEY WORD INDEX 244

Issue No. 2

Improved implicit integrators for transient impact problems — geometric admissibility within the conserving framework: T. A. Laursen and G. R. Love 245

Unified formulation of radiation conditions for the wave equation: S. Krenk 275

On the formulation of closest-point projection algorithms in elastoplasticity — part I: The variational structure: F. Armero and A. Pérez-Foguet 297

On the formulation of closest-point projection algorithms in elastoplasticity — part II: Globally convergent schemes: A. Pérez-Foguet and F. Armero 331

A quadtree data structure for the coupled finite-element/element-free Galerkin method: H. Karutz and W. B. Kraetzig 375

Interval static displacement analysis for structures with interval parameters: S. Chen, H. Lian and X. Yang 393

On the equivalance of the time domain differential quadrature method and the dissipative Runge–Kutta collocation method: T. C. Fung 409

On the computation of stress fields on polygonal domains with V-notches: J. Hesling and A. Jonsson 433

Three-dimensional time-harmonic Green's functions for a triclinic full-space using a symbolic computation system: M. Dravinski and Y. Niu 455

Shape optimization with hybrid-Trefftz displacement elements: J. A. Teixeira de Freitas and I. Cismasiu 473

Issue No. 3

Essential boundary condition enforcement in meshless methods: boundary flux collocation method: C.-K. C. Wu and M. E. Plesha 499

Elastoplastic dynamic analysis with hybrid stress elements: J. A. Teixeira de Freitas and Z. M. Wang 515

On the optimal cooling strategy for variable-speed continuous casting: D. Constales, J. Kačur and R. Van Keer 539

Topology optimization in wavelet space: T. A. Poulsen 567

Two hybrid stress membrane finite element families with drilling rotations: S. Geyer and A. A. Groenwold 583

Variational principles for non-conforming finite element methods: W. Chen 603

The least-squares finite element method in elasticity—Part I: Plane stress or strain with drilling degrees of freedom: B. Jiang and J. Wu 621

On time integration of viscoplastic constitutive models suitable for creep: H. L. Schreyer 637

Characteristics of waves in a functionally graded cylinder: X. Han, G. R. Liu, Z. C. Xi and K. Y. Lam 653

A procedure for approximation of the error in the EFG method: L. Gavete, J. L. Cuesta and A. Ruiz 677

An efficient multi-layer planar 3D fracture growth algorithm using a fixed mesh approach: E. Siebrits and A. P. Peirce 691

Buckling optimization and antioptimization of composite plates: uncertain loading combinations: A. R. de Faria 719

Variable thermal singularity boundary elements in the study of neighbouring singularities: N. K. Mukhopadhyay 733

Issue No. 4

A hybrid boundary node method: J. Zhang, Z. Yao and H. Li 751

Meshless approach to shape optimization of linear thermoelastic solids: F. Bobaru and S. Mukherjee 765

Use of the tangent derivative boundary integral equations for the efficient computation of stresses and error indicators: K. H. Muci-Küchler, J. C. Miranda-Valenzuela and S. Soriano-Soriano 797

An augmented Lagrangian approach to essential boundary conditions in meshless methods: G. Ventura 825

Solving 2D transient rolling contact problems using the BEM and mathematical programming techniques: J. A. González and R. Abascal 843

An improved generalized particle algorithm that includes boundaries and interfaces: G. R. Johnson, S. R. Beissel and R. A. Stryk 875

Evaluation of 2-D Green's boundary formula and its normal derivative using Legendre polynomials, with an application to acoustic scattering problems: S. A. Yang . . . 905

Optimal mesh design for the finite element approximation of reaction–diffusion problems: C. Xenophontos 929

Polynomial approximation of shape function gradients from element geometries: C. R. Dohrmann and M. M. Rashid 945

Finite element buckling analysis of rotationally periodic laminated composite shells: Z. Xiang, M. Xue, Y. Liu and Z. Cen 959

Detection of bifurcation points along a curve traced by a continuation method: S. Lopez 983

Issue No. 5

Overlapping Schwarz preconditioners for spectral element discretizations of convection-diffusion problems: L. F. Pavarino 1005

Non-weak/strong solutions in gas dynamics: a C^{11} *p*-version STLSFEF in Lagrangian frame of reference using ρ, *u*, *p* primitive variables: K. S. Surana and D. G. Van Dyne 1025

Non-weak/strong solutions in gas dynamics: a C^{11} *p*-version STLSFEF in Eulerian frame of reference using ρ, *u*, *p* primitive variables: K. S. Surana and D. G. Van Dyne 1051

Three-dimensional adaptive meshing by subdivision and edge-collapse in finite-deformation dynamic–plasticity problems with application to adiabatic shear banding: J. F. Molinari and M. Ortiz 1101

An implicit method for the analysis of transient flows in pipe networks: G. P. Greyvenstein 1127

Numerical simulation of Lamb wave scattering in semi-infinite plates: J. M. Galán and R. Abascal 1145

Higher-order accurate time-step-integration algorithms by post-integration techniques: T. C. Fung 1175

Finite horizon H_∞ filter and its 2^N algorithm: Z. G. Wu, A. Y. T. Leung and W. X. Zhong 1195

High-order finite volume schemes for the advection–diffusion equation: J. A. Hernández 1211

Simulating the propagation of displacement discontinuities in a regularized strain-softening medium: G. N. Wells, L. J. Sluys and R. de Borst 1235

BOOK REVIEW 1257

Issue No. 6

Computational micro-mechanical model of flexible woven fabric for finite element impact simulation: A. Tabiei and I. Ivanov 1259

An interactive geometry utility environment for multi-disciplinary computational engi neering: Y. Zheng, N. P. Weatherill and E. A. Turner-Smith 1277

Adaptive backward Euler time stepping with truncation error control for numerical modelling of unsaturated fluid flow: D. Kavetski, P. Binning and S. W. Sloan . . . 1301

Convergence analysis of a hierarchical enrichment of Dirichlet boundary conditions in a mesh-free method: W. Han, G. J. Wagner and W. K. Liu 1323

Tetrahedral composite finite elements: P. Thoutireddy, J. F. Molinari, E. A. Repetto and M. Ortiz 1337

Higher-order responses of three-dimensional elastic plate structures and their numerical illustration by *p*-FEM: M. Dauge, A. Rössle and Z. Yosibash 1353

Tetrahedral mesh improvement via optimization of the element condition number: L. A. Freitag and P. M. Knupp 1377

An energy and momentum conserving method for rigid–flexible body dynamics: M. A. Puso 1393

A flux-limited numerical method for solving the MHD equations to simulate propulsive plasma flows: K. Sankaran, L. Martinelli, S. C. Jardin and E. Y. Choueiri 1415

Multifrontal incomplete factorization for indefinite and complex symmetric systems: Y. Qu and J. Fish 1433

Three-dimensional finite element calculations in acoustic scattering using arbitrarily shaped convex artificial boundaries: R. Tezaur, A. Macedo, C. Farhat and R. Djellouli 1461

On non-linear behaviour of spherical shallow shells bonded with piezoelectric actuators by the differential quadrature element method (DQEM): X. Wang and Y. Wang . . 1477

A canonical form return mapping algorithm for rate independent plasticity: M. A. Keavey 1491

Issue No. 7

An adaptive-recursive staggering strategy for simulating multifield coupled processes in microheterogeneous solids: T. I. Zohdi 1511

Thermo-elasto-plastic finite element analysis of quasi-state processes in Eulerian reference frames: J. Y. Shanghvi and P. Michaleris 1533

On configurational forces in the context of the finite element method: R. Mueller, S. Kolling and D. Gross 1557

Hat interpolation wavelet-based multi-scale Galerkin method for thin-walled box beam analysis: Y. Y. Kim and G.-W. Jang 1575

A new numerical method for the boundary optimal control problems of the heat conduction equation: H. M. Park and W. J. Lee 1593

Comparison of method of lines and finite difference solutions of 2-D Navier–Stokes equations for transient laminar pipe flow: N. Selçuk, T. Tarhan and S. Tanrıkulu . . 1615

Stress analysis of gear teeth using displacement potential function and finite differences: M. A. S. Akanda, S. R. Ahmed and M. W. Uddin 1629

A GA-based technique for layout optimization of truss with stress and displacement constraints: I. A. Azid, A. S. K. Kwan and K. N. Seetharamu 1641

A one-dimensional theory of thin-walled rectangular box beams under torsion and out-of-plane bending: Y. Y. Kim and Y. Kim 1675

Analytical integrations in 2D BEM elasticity: A. Salvadori 1695

Development of shear locking-free shell elements using an enhanced assumed strain formulation: J. M. César de Sá, R. M. Natal Jorge, R. A. Fontes Valente and P. M. Almeida Areias 1721

Non-singular boundary integral formulations for plane interior potential problems: W. S. Hwang, L. P. Hung and C. H. Ko 1751

BOOK REVIEW 1763

Issue No. 8

A finite point method for compressible flow: R. Löhner, C. Sacco, E. Oñate and S. Idelsohn 1765

A new class of C^n interpolations and its application to the finite element method: H. Hashemolhosseini, N. Sadati and M. Farzin 1781

Time-discretized variational formulation of non-smooth frictional contact: A. Pandolfi, C. Kane, J. E. Marsden and M. Ortiz 1801

Arbitrary Lagrangian–Eulerian (ALE) formulation for hyperelastoplasticity: A. Rodríguez-Ferran, A. Pérez-Foguet and A. Huerta 1831

An implicit BEM formulation for gradient plasticity and localization phenomena: A. Benallal, C. A. Fudoli and W. S. Venturini 1853

Hierarchical model adaptivity in finite element analysis for non-linear plate problems: K. Fu 1871

Finite element evaluation of mixed mode stress intensity factors in functionally graded materials: J.-H. Kim and G. H. Paulino 1903

Moving particle finite element method: S. Hao, H. S. Park and W. K. Liu 1937

The extended finite element method (XFEM) for solidification problems: J. Chessa, P. Smolinski and T. Belytschko 1959

Design space optimization using a numerical design continuation method: I. Y. Kim and B. M. Kwak 1979

Three-dimensional finite element solution of gas-assisted injection moulding: F. Ilinca and J.-F. Hétu 2003

Issue No. 9

Contact between 3D beams with rectangular cross-sections: P. Litewka and P. Wriggers 2019

Second-order optimal control algorithm for complex systems: M. L. Kaplan and J. H. Heegaard 2043

Mixed-enhanced formulation for geometrically linear axisymmetric problems: E. P. Kasper and R. L. Taylor 2061

Meshfree analysis and design sensitivity analysis for shell structures: N. H. Kim, K. K. Choi, J.-S. Chen and M. E. Botkin 2087

A simple algorithm for localized construction of non-matching structural interfaces: K. C. Park, C. A. Felippa and G. Rebel 2117

Low-frequency assessment of the *in situ* acoustic absorption of materials in rooms: an inverse problem approach using evolutionary optimization: G. Dutilleux, F. C. Sgard and U. R. Kristiansen 2143

A stream function implicit finite difference scheme for 2D incompressible flows of Newtonian fluids: V. I. Bubnovich, C. E. Rosas and N. O. Moraga 2163

Hybrid time domain solvers for the Maxwell equations in 2D: E. Abenius, U. Andersson, F. Edelvik, L. Eriksson and G. Ledfelt 2185

Development of a simple and efficient method for robust optimization: D. H. Jung and B. C. Lee 2201

Implementation of cyclic plasticity models based on a general form of kinematic hardening: M. Kobayashi and N. Ohno 2217

Studies of multi-start clustering for global optimization: W. Tu and R. W. Mayne . . . 2239

An approach to multi-start clustering for global optimization with non-linear constraints: W. Tu and R. W. Mayne 2253

Issue No. 10

Conservation properties of a time FE method—part III: Mechanical systems with holonomic constraints: P. Betsch and P. Steinmann 2271

Speeding up the solution of thermal EHL problems: J. M. Ford and K. Chen 2305

A simplified approach for incorporating thickness stress in the analysis of sheet metal forming using shell elements: J. W. Cho, D. Y. Yang and W. J. Chung 2311

A posteriori error estimation in non-linear FE analyses of shell structures: R. Lackner and H. A. Mang 2329

Constitutive modeling of cementitious materials in the framework of chemoplasticity: R. Lackner, Ch. Hellmich and H. A. Mang 2357

An optimal high-order non-reflecting finite element scheme for wave scattering problems: D. Givoli and I. Patlashenko 2389

Singularities in anisotropic steady-state heat conduction using a boundary element method: N. S. Mera, L. Elliott, D. B. Ingham and D. Lesnic 2413

Issue No. 11

Optimum design of stochastically excited non-linear dynamic systems without geometric constraints: M. M. Oblak, A. S. Lesnika and B. J. Butinar 2429

A plasticity based model and an adaptive algorithm for finite element analysis of reinforced concrete panels: J. Pravida and W. Wunderlich 2445

Remeshing for metal forming simulations—Part I: Two-dimensional quadrilateral remeshing: D.-Y. Kwak, J.-S. Cheon and Y.-T. Im 2463

Remeshing for metal forming simulations—Part II: Three-dimensional hexahedral mesh generation: D.-Y. Kwak and Y.-T. Im 2501

A 3D brick element based on Hu–Washizu variational principle for mesh distortion: Y. P. Cao, N. Hu, J. Lu, H. Fukunaga and Z. H. Yao 2529

Non-planar 3D crack growth by the extended finite element and level sets—Part I: Mechanical model: N. Moës, A. Gravouil and T. Belytschko 2549

Non-planar 3D crack growth by the extended finite element and level sets—Part II: Level set update: A. Gravouil, N. Moës, and T. Belytschko 2569

Issue No. 12

Non-linear version of stabilized conforming nodal integration for Galerkin mesh-free methods: J.-S. Chen, S. Yoon and C.-T. Wu 2587

Hybrid-stress solid elements for shell structures based upon a modified variational functional: K. Y. Sze, S. H. Lo and L.-Q. Yao 2617

A control volume capacitance method for solidification modelling with mass transport: K. Davey and N. J. Rodriguez 2643

Automatic generation of anisotropic quadrilateral meshes on three-dimensional surfaces using metric specifications: Y. K. Lee and C. K. Lee 2673

Implicit stress integration procedure for small and large strains of the Gurson material model: M. Kojic, I. Vlastelica and M. Zivkovic 2701

Reconstructing dynamic events from time-limited spatially distributed data: J. F. Doyle 2721
